

# CeMEAI

CEPID - Center for Mathematical  
Sciences Applied to Industry

## Annual Report CEPID-CeMEAI- 2023 – 2024

**Project Title: Center for Mathematical Sciences Applied to Industry**

**Coordinator: José Alberto Cuminato**

**Host Institution: ICMC-USP - São Carlos**

**Fapesp ID Number: 2013/07375-0**

**Project duration: 01/July/2013–30/June/2025**

**Report Period: 01/July/2023 – 30/June/2024**

**Report Number: 11**

# Contents

<b>1</b>	<b>Introduction and Summary of the Initial Plan</b>	<b>5</b>
1.1	Introduction . . . . .	5
1.2	Summary for the 2018 proposal and its goals . . . . .	5
1.3	Summary of Achievements July 2023 – June 2024 . . . . .	7
1.4	Awards . . . . .	8
<b>2</b>	<b>Research Team</b>	<b>10</b>
2.1	Coordination . . . . .	10
2.2	Principal Investigators . . . . .	10
2.3	Associate Investigators . . . . .	11
2.4	Completed and Ongoing Post-doctorate Projects . . . . .	11
<b>3</b>	<b>High Impact Research and Projects</b>	<b>18</b>
3.1	Introduction OLD . . . . .	18
3.2	High Impact Publications . . . . .	18
3.2.1	Most Cited Papers 2023-2024 . . . . .	18
3.2.2	Papers in High Impact Journals 2023-2024 (JCR>7) . . . . .	20
3.3	High Impact Projects . . . . .	21
3.3.1	FAPESP eScience Technological Innovation Programs: Crime, Insecurity and Legitimacy: a transdisciplinary approach . . . . .	21
3.3.2	Development of algebraic multiscale preconditioners for oil reservoir simulation . . . . .	21
3.3.3	Cutting, packing, lot-sizing, scheduling, routing and location problems and their integration in industrial and logistics settings . . . . .	21
3.3.4	Methodologies and Reliability Metrics of Well-Drilling Equipment . . . . .	22
3.3.5	Exploring the multimodal approach in flood detection and predictions . . . . .	22

3.3.6 EVA - VIRTUAL ASSISTANT FOR PREGNANT WOMEN: FOLLOW-UP OF PHYSICAL ACTIVITY . . . . .	23
<b>4 Innovation and Technology Transfer Report</b>	<b>24</b>
4.1 Introduction . . . . .	24
4.2 CeMEAI's Activities . . . . .	24
4.2.1 Knowledge Transfer Workshops . . . . .	24
4.2.2 Meetings with Partners . . . . .	25
4.2.3 Corporate Education as an Technology Transfer Activity . . . . .	25
4.2.4 Hybrid PBL as an Technology Transfer Activity . . . . .	26
4.3 New Initiatives . . . . .	26
<b>5 Education and Knowledge Diffusion Report</b>	<b>27</b>
5.1 Introduction . . . . .	27
5.2 Ongoing Projects . . . . .	27
5.2.1 MECAI . . . . .	27
5.2.2 MBA in Data Science . . . . .	27
5.2.3 MBA in Data Security . . . . .	28
5.2.4 EduSCar . . . . .	28
5.3 Dissemination . . . . .	28
5.3.1 Website and Social Media . . . . .	28
<b>6 Institutional Support to the Project</b>	<b>29</b>
<b>7 Activities plan for the next period</b>	<b>30</b>
<b>Appendices</b>	<b>31</b>
<b>A M.Sc. and PhD Students</b>	<b>32</b>
A.1 Ongoing PhDs . . . . .	32
A.2 Completed Ph.D's . . . . .	45
A.3 Ongoing M.sc. . . . .	48
A.4 Completed M.sc. . . . .	58

B.3 Papers . . . . .	65
B.4 Papers in Conference Proceedings . . . . .	88

# **1. Introduction and Summary of the Initial Plan**

## **1.1 INTRODUCTION**

---

This report describes the activities of the Center for Mathematical Sciences Applied to Industry (RIDC-CeMEAI) in the period July/2023 through June/2024. In this period the eleventh year of the project, most of the activities promised in the initial proposal have been implemented. New proposals, whether from industry or funding agencies, have been taken on board. The CPA-IA IARA - Artificial Intelligence in the Remaking of Urban Environments is being implemented, as has the new CPA proposal jointly with UNICAMP, UNESP and SENAI, the CDII. The ICMC EMBRAPII Unit was approved and we expect new projects resulting from it. The charging (tarifação) of the Cluster is working and CeMEAI already has a client using it. The Education and Knowledge Dissemination coordination has been very active as we shall detail in the main body of the report. The project manager has been working full time to increase contacts with industries resulting in new projects and collaborations. In section 1.3 of this report, we present a summary of the progress made during the period. Table 1.1 brings a quantitative summary of the Center's academic output. In the main body of this report, we shall present in detail the activities of the RIDC-CeMEAI for each of its three main research groups, including projects with industry that have been contracted during this reporting period.

## **1.2 SUMMARY FOR THE 2018 PROPOSAL AND ITS GOALS**

---

The State of São Paulo concentrates a large part of the industry in Brazil and also many of the best academic research institutions. However, mainly due to a lack of coordination, the industry/academia interaction has not yet grown in the region. Due to the nature, complexity, and scale of the activities proposed in this project, we expect the Center will need some time to mature and accomplish the proposed schedule. In addition, the very nature of the Center is interdisciplinary as it involves groups in several areas of applied mathematics, statistics, and computer science. This is very important for the success of the Center because the problems coming from the industry are very often multidisciplinary. Another long-term objective results from the fact that Brazil has a severe shortage of human resources trained to work on industrial/government problems. Our mathematical sciences courses (undergraduate and graduate) nowadays focus on the training of students to be good academics and not on working alongside multidisciplinary teams for practical problem-solving. On the other hand, the industry in itself is not used to seeking help from academia, especially from mathematicians. We are aware that all of these difficulties are very complex and we are not going to solve all of them by starting this center. However, we do believe that by starting this Center we can enhance the usage of mathematical techniques by the industrial sector and disseminate this practice.

## CHAPTER 1. INTRODUCTION AND SUMMARY OF THE INITIAL PLAN

The justification for the renewal of the proposed project of RIDC-CeMEAI lies in the fact that despite the use of mathematics by industries in Brazil being a novelty, RIDC-CeMEAI managed in 5 years to attract a considerable number of projects, and is changing the scenario described in the previous paragraph. In the beginning, the Center's activity was not known by companies, so we had to make a lot of effort to get projects from the industry. Now, this is starting to change and many times we get contact from industries willing to work with us. So the continuation of the funding from Fapesp will be crucial to solidify this interest and make the Center a new thrust for the development of São Paulo State. The extension of the Center will make it stronger and will help to accomplish its mission set forth in the initial plan.

1. The RIDC-CeMEAI will continue to be a Center for the production and diffusion of knowledge in applied mathematical sciences, identifying potential problems and areas that require attention, enabling the interaction between researchers and industries in these areas. More specifically, the RIDC-CeMEAI will promote contact between experts in the mathematical sciences and entrepreneurs, industry workers, researchers, and practitioners from other fields of knowledge.
2. The RIDC-CeMEAI will continue to provide an adequate environment and structure for the development of applied research to the whole industrial sector including healthcare, financial, agriculture, and trade.
3. The RIDC-CeMEAI has been working towards building a solid and lasting multidisciplinary community by training students to become able to collaborate in solving practical problems and to be prepared to replicate the center's philosophy in other regions of the country.
4. The RIDC-CeMEAI is hard-working toward becoming an international reference for successful cooperation between academia and industry/government in mathematical sciences.

## 1.3 SUMMARY OF ACHIEVEMENTS JULY 2023 – JUNE 2024

---

A primary objective of this project is to produce a virtuous cycle going from high-level mathematical research to applications and vice versa.

During the period of this report, 278 papers in scientific journals have been published by the 36 principal and 90 associate investigators of CeMEAI.

In the present report, 6 projects that describe collaborations with industry as well as with public and private “non-Mathematical” institutions are reported. Most of these projects have already resulted in scientific publications, as is also the case of the PhD Thesis being advised by members of CeMEAI, in the period.

Diffusion and Educational activities have been exponentially incremented in this period, as can be verified in the sections: diffusion and short courses, Mathematical Clinic activities, production of videos, support for seminars highlighting applications and surprising facts of Mathematics, press releases and movie screening. See Table 1.1

The MBA on Data Science is on its fifth edition with 218 students, more than 700 students have already completed the MBA in the first four editions and the sixth edition is planned for 2025.

**TABLE 1.1: PROJECT MAIN ACTIVITIES - SUMMARY 2023-2024**

Activity	Total
<b>Students and Visiting Scholars</b>	
Ongoing & Completed Post-doctorate	101
Ongoing Ph.D.'s	230
Ongoing Masters	180
Completed Ph. D.'s	41
Completed Masters	55
<b>Research</b>	
Books	4
Book Chapters	26
Papers	278
Papers in Conferences	108
Awards	23
<b>Innovation and Technology Transfer (KTT)</b>	
Meetings with Partners	398
<b>Education and Knowledge Diffusion</b>	
Videos Produced	72
Video Views	26.847
Press Releases	61
Website Views	31.614

## 1.4 AWARDS

---

1. 2023 The 23rd International Conference on Computational Science and Its Applications -Best paper - Main Track - "Robust Seeded Image Segmentation Using Adaptive Label Propagation and Deep Learning-Based Contour Orientation". Aldimir José Bruzadin, Marilaine Colnago, Rogério Galante Negri and Wallace Casaca  
<https://cemeai.icmc.usp.br/pesquisador-do-cemeai-conquista-premio-internacional-na-area-de-ciencias-matematicas-e-aplicadas>
2. 2024 José Mario Martínez and Claudia Sagastizábal were nominated SIAM (Society for Industrial and Applied Mathematics) Fellows  
<https://www.siam.org/programs-initiatives/prizes-awards/fellows-program/fellows-directory/?page=1&keywords=>
3. 2024 Kepler Award - SBMAC "Optimized delay of the second Covid-19 vaccine dose reduces ICU admissions". **Claudia Sagastizábal, Paulo J. S. Silva, Luis Gustavo Nonato and Tiago Pereira**  
<https://www.sbmac.org.br/premio-kepler/>
4. 2024 Breno Lívio Silva de Almeida, João Fernando Marar de Inteligência Artificial Award  
Supervisor: **André C. P. L. F. de Carvalho**
5. 2024 Saulo Martiello Mastelini, Best PhD Thesis CTD-SBC 2024 (with João Gama), Sociedade Brasileira de Computação (SBC)  
Supervisor: **André C. P. L. F. de Carvalho**
6. 2024 Edresson Casanova Best PhD Dissertation Award at PROPOR 2024, International Conference on Computational Processing of Portuguese (PROPOR 2024)  
Supervisor: **Moacir Antonelli Ponti**
7. 2022 Top 2% World Scientist., Univ. of Stanford and Plos Biology.  
DOI: 10.17632/btchxktzyw.3.  
Member: **Anderson Rezende Rocha** (single year)  
Member: **André Carlos Ponce de Leon Ferreira de Carvalho** (career and single year)  
Member: **Fábio Gagliardi Cozman** (career and single year)  
Member: **João Paulo Papa** (career and single year)  
Member: **José Mario Martinez Perez** (career and single year)  
Member: **Liang Zhao** (career)  
Member: **Moacir Ponti** (single year)  
Member: **Rodolfo Ipolito Meneguette** (single year)
8. 2024 Top 52 Computer Scientists in Brasil (D-index > 30).  
<https://research.com/scientists-rankings/computer-science/br>  
Member: **Anderson Rezende Rocha** (17th)  
Member: **André Carlos Ponce de Leon Ferreira de Carvalho** (13rd)  
Member: **Ernesto G. Birgin** (38th)  
Member: **Francisco Aparecido Rodrigues** (33rd)

## CHAPTER 1. INTRODUCTION AND SUMMARY OF THE INITIAL PLAN

Member: **João Paulo Papa** (12nd)

Member: **José Mario Martinez Perez** (8th)

9. 2024 Top 28 Mathematics Scientists in Brasil (D-index > 30).

<https://research.com/scientists-rankings/mathematics/br>

Member: **Claudia Sagastizábal** (17th)

Member: **Ernesto G. Birgin** (15th)

Member: **José Mario Martinez Perez** (2nd)

10. 2024 Top 33 Engineering and Technology Scientists in Brasil (D-index > 30).

<https://research.com/scientists-rankings/engineering-and-technology/br>

Member: **Reinaldo Morabito** (7th)

## 2. Research Team

### 2.1 COORDINATION

---

- **Center Director:** José Alberto Cuminato - ICMC-USP
- **Deputy Director:** José Mario Martinez Perez - IMECC-UNICAMP
- **Education and Knowledge Dissemination Coordinator:** Lúcio Tunes dos Santos - IMECC-UNICAMP
- **Technology Transfer Coordinator:** Francisco Louzada Neto - ICMC-USP
- **RIDC Executive Manager:** Maria Fernanda Marreta -ICMC- USP
- **Manager of Education and Dissemination of Knowledge:** Gustavo Blengini Faria - ICMC-USP

### 2.2 PRINCIPAL INVESTIGATORS

---

#### Optimization and Operations research

Roberto Andreani (IMECC-UNICAMP), Ernesto G. Birgin (USP), Maicon Ribeiro Correa (IMECC-UNICAMP), Carlile Lavor (IMECC-UNICAMP), José Mario Martínez Perez (IMECC-UNICAMP), Pedro Augusto Munari Junior (UFSCar), Débora P. Ronconi (USP), Claudia Alejandra Sagastizábal (IMECC-UNICAMP), Sandra A. Santos (Unicamp), Maristela Oliveira dos Santos (ICMC-USP), Lucio Tunes dos Santos (IMECC-UNICAMP), Geraldo Nunes Silva (UNESP), Paulo J. S. Silva (IMECC-UNICAMP), Maria do Socorro Rangel (UNESP) and Franklina M. B. Toledo (ICMC-USP).

#### Fluid Dynamics

João Luiz F. Azevedo (IAE), Gustavo Carlos Buscaglia (ICMC-USP), Antonio Castelo Filho (ICMC-USP), José Alberto Cuminato (ICMC-USP), Cassio M. Oishi (UNESP), Tiago Pereira da Silva (ICMC-USP), Fábio Simeoni de Sousa (ICMC-USP), Leandro Franco de Souza (ICMC-USP)

#### Statistics and Data Sciences

Vicente Garibay Cancho (ICMC-USP), Kalinka Regina Lucas Jaquie Castelo Branco (ICMC-USP), Nuno Manuel Morgadinho dos Santos Coelho (FDRP-USP), Alexandre Cláudio Bottazo Delbem (ICMC-USP), Nikolai V. Kolev (IME-USP), Zhao Liang (FFCLRP-USP), Francisco Louzada (ICMC-USP), João Paulo Papa (UNESP),

Francisco Aparecido **Rodrigues** (ICMC-USP), Mariá Cristina Vasconcelos Nascimento **Rosset** (UNIFESP), Jó **Ueyama** (ICMC-USP) Adenilso da Silva **Simão** (ICMC-USP) and Julio **Stern** (IME-USP).

## 2.3 ASSOCIATE INVESTIGATORS

---

### Optimization and Operations research

Marina **Andretta** (USP), Silvio A. de **Araujo** (UNESP), Victor Claudio Bento de **Camargo** (UFSCar) Eduardo Fontoura **Costa** (ICMC-USP), Aline Aparecida de Souza **Leão** (USP), Reinaldo **Morabito Neto** UFSCar, Valeriano Antunes de **Oliveira** (UNESP), Vitória **Pureza** (UFSCar), Helenice de Oliveira Florentino **Silva** (UNESP) and Edilaine Martins **Soler** (UNESP).

### Fluid Dynamics

Roberto F. **Ausas** (ICMC-USP), Analice Costacurta **Brandi** (UNESP), André Valdetaro Gomes **Cavalieri** (ITA), Livia Souza Freire **Grion** (ICMC-USP), Adolfo Gomes **Marto** (IAE), José Antonio **Rabi** (FZEA-USP), Maria Luísa Colluci da Costa **Reis** (IAE), Roberto Gil Annes da **Silva** (ITA), Edson Cezar **Wendland** (EESC-USP) and William Roberto **Wolf** (FEM-UNICAMP).

### Statistics and Data Sciences

Carlos **Affonso** (UNESP, Itapeva), Marinho G. **Andrade Filho** (ICMC-USP), Walther **Azzolini Júnior** (EESC-USP), Dennis **Brandão** (EESC-USP), Wallace Correa de Oliveira **Casaca** (UNESP), André C P L F de **Carvalho** (ICMC-USP), Katiane Silva **Conceição** (ICMC-USP), Fabio Gagliardi **Cozman** (EP-USP), Mariana **Curi** (ICMC-USP), Ronaldo **Dias** (IMECC-UNICAMP), Carlos A. R. **Diniz** (UFSCar), Júlio Cézar **Estrella** (ICMC-USP), André **Fujita** (IME-USP), Filippo **Ghiglieno** (UFSCar), Oilson Alberto **Gonzatto Junior** (ICMC-USP), Jorge Luis Bazan **Guzman** (ICMC-USP), Seiji **Isotani** (ICMC-USP), Bruno **Kimura** (UNIFESP), Marcelo de Souza **Lauretto** (EACH-USP), Ana Carolina **Lorena** (ITA), Ricardo Marcondes **Marcacini** (ICMC-USP), Marcello Augusto Faraco de **Medeiros** (EESC-USP), Eduardo Mario **Mendiondo** (EESC-USP), Rodolfo Ipolito **Meneguette** (ICMC-USP), Diego Carvalho do **Nascimento** (UDA-Chile), Luis Gustavo **Nonato** (ICMC-USP), Cibele Maria Russo **Novelli** (ICMC-USP), Krerley Irraciel Martins **Oliveira** (UFAL), Moacir de Miranda **Oliveira Junior** (FEA-USP), Afonso **Paiva Neto** (ICMC-USP), Gleici da Silva Castro **Perdoná** (FMRP-USP), Thomas Kaue Dal Maso **Peron** (ICMC-USP), Moacir Antonelli **Ponti** (ICMC-USP), Pedro Luiz **Ramos** (PUC-Chile) Dimas Betioli **Ribeiro** (ITA), Evandro Marcos Saidel **Ribeiro** (USP), Laura Letícia Ramos **Rifo** (IMECC-UNICAMP), Ricardo Araújo **Rios** (UFBA), Tatiane Nogueira **Rios** (UFBA), Anderson de Resende **Rocha** (IC-UNICAMP), Oscar Mauricio Hernandez **Rodriguez** (EESC-USP), André Luis Debiaso **Rossi** UNESP, João Carlos **Setubal** (IQ-USP), Albérico Borges Ferreira da **Silva** (IQSC-USP), Paulo Henrique Ferreira da **Silva** (UFBA), Diego Furtado **Silva** (ICMC-USP), Secundino **Soares Filho** (FEEC-UNICAMP), Anderson Luiz Ara **Souza** (UFPR) Adriano K. **Suzuki** (ICMC-USP), Ali **Tahzibi** (ICMC-USP), Renato **Tinós** (FFCLRP-USP) and Claudio Fabiano Motta **Toledo** (ICMC-USP) and Vera Lucia Damasceno **Tomazella** (UFSCar).

## 2.4 COMPLETED AND ONGOING POST-DOCTORATE PROJECTS

---

### Ongoing

1. Adriano Rivolli da Silva. Start: 2023. ICMC-USP. Funding: TJ-SP. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho

2. Ahmad Almazloum. Start: 2024. UNICAMP. Funding: Samsung Eletrônica da Amazônia. Supervisor: Anderson de Rezende Rocha
3. Alessandra Marli Maria Moraes Gouveia. Start: 2023. ITA. Funding: FAPESP. Supervisor: Mariá Cristina Vasconcelos Nascimento Rosset
4. Alex Marino Gonçalves de Almeida. Start: 2022. ICMC-USP. Funding: TJ-SP. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
5. Amir Jalilifard. Start: 2024. UNICAMP. Supervisor: Anderson de Rezende Rocha
6. Anderson Paulo Avila Santos. Start: 2024. ICMC-USP. Funding: CNPq. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
7. Angelica Caseri. Start: 2022. ICMC-USP. Supervisor: Francisco Aparecido Rodrigues
8. Bernardo Luiz Rocha Ribeiro. Start: 2023. UNICAMP. Funding: FAPESP. Supervisor: William Roberto Wolf
9. Bernardo Nunes Gonçalves. Start: 2020. EP-USP. Funding: FAPESP. Supervisor: Fabio Gagliardi Cozman
10. Caetano Mazzoni Ranieri. Start: 2021. ICMC-USP. Funding: FAPESP. Supervisor: Jó Ueyama
11. Carolina Bertuzzi. Start: 2023. ICMC-USP. Supervisor: Francisco Aparecido Rodrigues
12. Cláudia Aline Azevedo dos Santos Mesquita. Start: 2023. ICMC-USP. Supervisor: Katiane Silva Conceição
13. Claudio Filipi Gonçalves dos Santos. Start: 2023. UNESP. Supervisor: João Paulo Papa
14. Daiane de Souza Santos. Start: 2023. ICMC-USP. Funding: FAPESP. Supervisor: Vicente Garibay Cancho
15. Daniel Oliveira Dantas. Start: 2021. IME-USP. Funding: PRP-USP. Supervisor: André Fujita
16. Daniel Samuel Jodas. Start: 2024. UNESP. Funding: Petrobras. Supervisor: João Paulo Papa
17. Daniela Lopes Freire. Start: 2020. ICMC-USP. Funding: TJ-SP. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
18. Davi Pereira dos Santos. Start: 2022. ICMC-USP. Funding: FUSP. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
19. Didier Vega-Oliveros. Start: 2020. UNICAMP. Funding: FAPESP. Supervisor: Anderson de Rezende Rocha
20. Diego Trindade de Souza. Start: 2020. IME-USP. Funding: PRP-USP. Supervisor: André Fujita
21. Diogo Henrique da Silva. Start: 2021. ICMC-USP. Funding: FAPESP. Supervisor: Francisco Aparecido Rodrigues
22. Douglas Coates. Start: 2023. ICMC-USP. Funding: FAPESP. Supervisor: Ali Tahzibi
23. Douglas Donizeti de Castilho Braz. Start: 2022. ICMC-USP. Funding: Volt Robotics. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho

24. Douglas Nogueira do Nascimento. Start: 2024. ICMC-USP. Funding: FAPESP. Supervisor: Franklina Maria Bragion de Toledo
25. Douglas Rodrigues. Start: 2023. UNESP. Funding: FAPESP. Supervisor: João Paulo Papa
26. Edilson Machado de Assis. Start: 2024. UNESP. Funding: Petrobras. Supervisor: João Paulo Papa
27. Eduardo Ramos. Start: 2020. ICMC-USP. Supervisor: Francisco Louzada Neto
28. Ellen Souza. Start: 2020. ICMC-USP. Funding: Câmara dos Deputados. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
29. Emely Pujolli da Silva. Start: 2022. UNICAMP. Funding: Samsung Eletrônica da Amazônia. Supervisor: Anderson de Rezende Rocha
30. Fabíola S. F. Pereira. Start: 2018. ICMC-USP. Funding: Algar Telecom. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
31. Farney Coutinho Moreira. Start: 2021. ITA. Funding: FAPESP. Supervisor: Joao Luiz Filgueiras de Azevedo
32. Gabriel Cirac. Start: 2021. UNICAMP. Funding: Shell Inc. Supervisor: Anderson de Rezende Rocha
33. Geovane Augusto Haveroth. Start: 2022. UNICAMP. Funding: FAPESP. Supervisor: Maicon Ribeiro Correa
34. Gracyela Salcedo. Start: 2022. ICMC-USP. Funding: FAPESP. Supervisor: Ali Tahzibi
35. Guilheme Brandão Martins. Start: 2024. UNESP. Funding: Petrobras. Supervisor: João Paulo Papa
36. Guilherme Augusto Marabelli Clerice. Start: 2024. UNESP. Supervisor: Helenice de Oliveira Florentino Silva
37. Guilherme Freire Roberto. Start: 2024. ICMC-USP. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
38. Gustavo Bochio. Start: 2020. ICMC-USP. Supervisor: Francisco Louzada Neto
39. HUGO ALBERTO CASTILLO SANCHEZ. Start: 2021. ICMC-USP. Funding: FAPESP. Supervisor: Antonio Castelo Filho
40. Hugo Felippe da Silva Lui. Start: 2024. UNICAMP. Funding: Air Force Office of Scientific Research. Supervisor: William Roberto Wolf
41. Igor Albuquerque Maia. Start: 2023. ITA. Funding: FAPESP. Supervisor: André Valdetaro Gomes Cavalieri.
42. Igor Leonardo Oliveira Bastos. Start: 2024. UNICAMP. Supervisor: Anderson de Rezende Rocha
43. Jean Helder Marques Ribeiro. Start: 2023. UNICAMP. Funding: FAPESP. Supervisor: William Roberto Wolf
44. João Luiz Junho Pereira. Start: 2022. ITA. Funding: FAPESP. Supervisor: Ana Carolina Lorena
45. José Antonio Tumialán. Start: 2024. EESC-USP. Funding: FAFQ. Supervisor: Oscar Mauricio Hernandez Rodriguez

46. Jose Augusto Lustosa Filho. Start: 2022. UNICAMP. Funding: Shell Inc. Supervisor: Anderson de Rezende Rocha
47. Kamyla Maria Ferreira. Start: 2022. UFSCar. Funding: FAPESP. Supervisor: Pedro Augusto Munari Junior
48. Kuruvilla Joseph Abraham. Start: 2023. IEA-USP. Supervisor: Alexandre Cláudio Botazzo Delbem
49. Leandro Aparecido Passos Júnior. Start: 2023. UNESP. Funding: FAPESP. Supervisor: João Paulo Papa
50. Luis Felipe Acuña Alegria. Start: 2023. EESC-USP. Funding: FUSP. Supervisor: Oscar Mauricio Hernandez Rodriguez
51. Marcelo Meireles dos Santos. Start: 2021. IME-USP. Funding: PRP-USP. Supervisor: André Fujita
52. Marcio Dias. Start: 2021. ICMC-USP. Funding: PRP-USP. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
53. Marcos Cleison Silva Santana. Start: 2022. UNESP. Funding: SpotOn. Supervisor: João Paulo Papa
54. Marcos Roberto Fortulan. Start: 2020. EESC-USP. Funding: FIPAI. Supervisor: Oscar Mauricio Hernandez Rodriguez
55. Marcos Severo. Start: 2021. IME-USP. Funding: PRP-USP. Supervisor: André Fujita
56. Marlon Mauricio Hernández Cely. Start: 2018. EESC-USP. Funding: FUNCAMP. Supervisor: Oscar Mauricio Hernandez Rodriguez
57. Matheus Palmero Silva. Start: 2023. ICMC-USP. Funding: FAPESP. Supervisor: Francisco Aparecido Rodrigues
58. Michael Oliveira da Cruz. Start: 2024. UNICAMP. Funding: Shell Inc. Supervisor: Anderson de Rezende Rocha
59. Murillo Guimarães Carneiro. Start: 2023. FFCLRP-USP. Funding: FUSP. Supervisor: Zhao Liang
60. Murilo Garcia de Matos Amaral. Start: 2022. UNICAMP. Funding: Shell Inc. Supervisor: Anderson de Rezende Rocha
61. Nádia Félix Felipe da Silva. Start: 2020. ICMC-USP. Funding: Câmara dos Deputados. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
62. Nastaran Lotfi. Start: 2021. ICMC-USP. Funding: FAPESP. Supervisor: Francisco Aparecido Rodrigues
63. Nubia Regina Ventura. Start: 2024. ICMC-USP. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
64. Oilson Alberto Gonzatto Junior. Start: 2021. ICMC-USP. Supervisor: Francisco Louzada Neto
65. Oscar Cuadros Linares. Start: 2022. UNICAMP. Funding: Shell Inc. Supervisor: Anderson de Rezende Rocha
66. Pablo Giovanni Silva Carvalho. Start: 2023. ICMC-USP. Funding: FAPESP. Supervisor: Fabrício Simeoni de Sousa

67. Paula Sampaio Meirelles. Start: 2024. UNICAMP. Funding: Shell Inc. Supervisor: Anderson de Rezende Rocha
68. Paulo Aristarco Pagliosa. Start: 2023. UFMS. Supervisor: Afonso Paiva Neto
69. Paulo Pirozelli Almeida Silva. Start: 2023. EP-USP. Funding: FAPESP. Supervisor: Fabio Gagliardi Cozman
70. Rafael Gonçalves Pires. Start: 2024. UNESP. Funding: Petrobras. Supervisor: João Paulo Papa
71. Renato Fuzaro Miotto. Start: 2022. UNICAMP. Funding: FAPESP. Supervisor: William Roberto Wolf
72. Robson Bonidia. Start: 2024. ICMC-USP. Funding: The International Development Research Centre. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
73. Rômulo Brito da Silva. Start: 2023. UNESP. Funding: CNPq. Supervisor: Antonio Castelo Filho
74. Rubens Augusto Amaro Junior. Start: 2022. ICMC-USP. Funding: FAPESP. Supervisor: Fabrício Simeoni de Sousa
75. Tarcísio Costa Déda Oliveira. Start: 2024. UNICAMP. Supervisor: William Roberto Wolf
76. Thiago Ramos. Start: 2024. ICMC-USP. Funding: FAPESP. Supervisor: Luis Gustavo Nonato
77. Thomaz Marques Sena. Start: 2024. UNESP. Funding: FAPESP. Supervisor: João Paulo Papa
78. Victor Hugo Barella. Start: 2024. ICMC-USP. Funding: FAPESP. Supervisor: Luis Gustavo Nonato
79. Vinícius Rosa Máximo. Start: 2023. Unifesp. Supervisor: Mariá Cristina Vasconcelos Nascimento Rosset

## 3. High Impact Research and Projects

### 3.1 INTRODUCTION OLD

---

This Chapter describes CeMEAI's research projects of greatest impact either financially, scientifically or socially. Other projects can be found in the section **Projects** of the CeMEAI's website.

(<http://www.cemeai.icmc.usp.br/projetos>).

We start with the impact of CeMEAI's publications, **Table 3.1** shows the current h-index of the Center's publications since the beginning of the project.

TABLE 3.1: H-INDEX (2013-2024)

### **3.3 HIGH IMPACT PROJECTS**

---

#### **3.3.1 FAPESP ESCIENCE TECHNOLOGICAL INNOVATION PROGRAMS: CRIME, IN-SECURITY AND LEGITIMACY: A TRANSDISCIPLINARY APPROACH**

**Coordinator:** Luis Gustavo Nonato (USP-ICMC)

Based on Data Science and Artificial Intelligence techniques, the project aims to develop innovative analytical methodologies to investigate complex phenomena associated with crime, the persistence of feelings of insecurity in the population and their effects on democratic legitimacy. The study of the relationship between crime, feelings of insecurity and the legitimacy of justice institutions is also the main focus of the project. Another important objective is to train and qualify human resources so that they are able to use Data Science and Artificial Intelligence techniques in the field of Human and Social Sciences (CHS), bringing new perspectives of approach and differentiated training for professionals and researchers.

<https://bv.fapesp.br/en/auxilios/111614/criminality-insecurity-and-legitimacy-a-transdisciplinary-approach>

#### **3.3.2 DEVELOPMENT OF ALGEBRAIC MULTISCALE PRECONDITIONERS FOR OIL RESERVOIR SIMULATION**

**Coordinator:** Fabricio Simeoni de Sousa (USP-ICMC)

In this research project we will develop a preconditioning method based on the family of mixed multiscale methods "Multiscale Robin Coupled Method" that was developed in recent years by the proposing research group with support from Petrobras. To this end, we will first study the properties of the method and its effectiveness as a preconditioner in the case of known discretizations, to later motivate its extension to the more general case when the information and details of the underlying discretization that gives rise to the linear system are limited or not available.

Institutional/Industrial Partnerships: ICMC-USP, Petrobras S.A.

#### **3.3.3 CUTTING, PACKING, LOT-SIZING, SCHEDULING, ROUTING AND LOCATION PROBLEMS AND THEIR INTEGRATION IN INDUSTRIAL AND LOGISTICS SETTINGS**

**Coordinator:** Reinaldo Morabito Neto (UFSCAR)

This project addresses a wide range of discrete optimization and operations research problems, and aims to contribute with innovative approaches and solutions to production and supply chain management problems. The problems focused in this thematic project are divided into: (A) cutting problems, (B) packing problems, (C) lot-sizing problems, (D) scheduling problems, (E) routing problems (F) location problems and (G) the integration of these problems. In addition to the study and development of mathematical models related to these problems, solution methods and algorithms to solve them will be developed, and their computational performances will be analyzed. The project also aims to continue the integration and collaboration

of research groups from different institutions interested in these issues, as well as human resource training for research and technological developments. It is intended to intensify cooperation between the productive sector and academia, with the development of case studies in companies. It is expected, therefore, to enable collaborations and partnerships in the study of these problems and in the development of computational tools to be used in practice. The team of this project is composed of several researchers at various stages of their academic careers, from graduate students and recent doctors, to experienced researchers. This project is a continuation of three other FAPESP Thematic Projects, the first being developed between 2006 and 2010, the second between 2010 and 2015 and, the third between 2017 and 2023. In the first two projects, problems were studied mainly in (A), (B), (C), (D), as well as some integration of these problems (G). In the third project, problems (E) and (F) were added and the study of the integrations between the problems was intensified.

<https://bv.fapesp.br/en/auxilios/112287/cutting-packing-lot-sizing-scheduling-routing-and-location-problems>

### **3.3.4 METHODOLOGIES AND RELIABILITY METRICS OF WELL-DRILLING EQUIPMENT**

**Coordinator:** Francisco Louzada Neto (ICMC-USP)

The objective of this project is to develop statistical and computational methodologies, appropriate for the calculation of the reliability of various equipment used for the drilling wells, taking into consideration the provisions of the same throughout the system and their failure rates.

Institutional/Industrial Partnerships: ICMC-USP, Petrobras S.A.

**Funding:** R\$4.722.991,00

### **3.3.5 EXPLORING THE MULTIMODAL APPROACH IN FLOOD DETECTION AND PREDICTIONS**

**Coordinator:** Jó Ueyama (USP-ICMC)

This project aims to explore the multimodal approach for detecting and predicting floods. By multimodal, we mean that different sensing approaches will be explored to monitor urban rivers. The first sensor to be considered is an infrared sensor to measure the water level of the water stream. The second sensor are video cameras that capture images of the river in real-time, which are analyzed later. The third sensor is a barcode, which is being studied. The fourth consists of the use of artificial intelligence in monitoring urban rivers. The multimodal approach is usually explored for everyday tasks. For example, if a person wants to recognize the emotional state of another, he or she analyzes various modalities such as speech, face and body language. Studies have shown that the multimodal approach increases the success rate in recognizing emotions. This proposal aims to explore this approach in flood detection/prediction.

### **3.3.6 EVA - VIRTUAL ASSISTANT FOR PREGNANT WOMEN: FOLLOW-UP OF PHYSICAL ACTIVITY**

**Coordinator:** Gleici da Silva Castro Perdoná (FMRP-USP)

EVA is the world's first open source, Portuguese-speaking virtual personal assistant. Virtual assistants (AV) are software or a set of software capable of interacting with humans in natural language, such as writing and reading chats or speaking, listening and interpreting voice commands. Personal virtual assistants, on the other hand, are a category capable of adapting to a specific person, meeting their personal needs; the goal is - in the near future - to be something like a virtual friend with a unique personality, who has, for example, a tone of voice and behavior of his own.

EVA is an acronym for Virtual Analytical Assistant. The term Analytical because it is an auxiliary AV for data processing and statistical inferences based on Artificial Intelligence techniques and Mathematical Models.

The collected data will be obtained from around 200 volunteer pregnant women. The data will be generated by triaxial accelerometer sensors.

At the end of the project, the EVA and auxiliary software will be made available in open code (mostly) to researchers and enthusiasts, just mentioning the source in their respective projects.

Project website: <http://eva.fmrp.usp.br>

Institutional/Industrial Partnerships: PPSUS - FAPESP

Funding: R\$157.641,40

## **4. Innovation and Technology Transfer Report**

### **4.1 INTRODUCTION**

---

During its eleventh year of activities, the CEPID-CeMEAI's research team have strived continuously to maintain research and development of new and innovative methodologies up and running. Those technologies are based on mathematical sciences and aim to optimize designs and processes to reduce costs, focusing on the transference of mathematical technology to industry.

All the groups engaged in the CEPID-CeMEAI contributed to the technology transfer process. Although some groups used more specific approach models, generally, the focus was on thinking about practical problems and products, motivated by industrial/institutional projects or community needs, developing essential aspects of the projects in the academic environment, and training human resources, composed mainly by post-docs, PhDs, Masters and IC students, to the best possible level.

From the industrial/institutional/community side, the partnership was generally informally driven by one or a group of industrial/institutional staff responsible for the research, with which the academic team of the project maintains exchanges and collaboration, or by the community, that then absorbed the new technologies via software and systems.

### **4.2 CEMEAI'S ACTIVITIES**

---

Several actions related to innovation and technology transfer were carried out. The highlights are as follows.

#### **4.2.1 KNOWLEDGE TRANSFER WORKSHOPS**

During the last period, CeMEAI promoted the following workshops:

- 2024-01-13, 2024-03-23. 4th MBA on Data Science Workshop, which occurred remotely. There were presentations of 218 works distributed on virtual rooms.  
More information can be found at  
<https://cemeai.icmc.usp.br/evento/4o-workshop-de-defesas-mba-ciencias-de-dados-cemeai-icmc-usp/>
- 2024-02-19 to 2024-02-23. X Study Group with Industry, promoted with SENAI-SP. There were eight problems from eight different companies: Metalsa (manufacturing), Bayer (chemistry), Sabó (manufacturing), Capricórnio (manufacturing), CSD br (finance), Datawake (IT), SEG (manufacturing)

and Congas (Energy).

More information can be found at <https://cemeai.icmc.usp.br/WSMPI/10a-edicao/>;

- The 11th Study Group with Industry will be promoted by CeMEAI in February 2025.

### **4.2.2 MEETINGS WITH PARTNERS**

One of the main actions of CeMEAI is to search for industrial problems, opportunities and partnerships, providing advice to researchers, students and industries. In the present context, we have the Technological Clinics, a consultancy service for researchers, students and industries needing mathematical, statistical and computing solutions. We set up a team of research and staff of the CEPID-CeMEAI to listen and understand the problems and direct them to one of the CEPID-CeMEAI research groups so that solutions can be delivered quickly and effectively.

During the period of this report, we had 38 meeting with industrial partners. Some of the companies that we met up are: SABESP, MCTI, SEFAZ, Escola Governo Goias, Comgas, Pentagro, Vivo, CSD BR, Stelantis, Jacto, Splice, Intel, Facens, Capricornio, SEG, Bayer, Sabó, Datawake, Trinity, Tigre and Neuraltec.

### **4.2.3 CORPORATE EDUCATION AS AN TECHNOLOGY TRANSFER ACTIVITY**

CeMEAI's objective is to promote closer ties between the academic and industrial communities, ensuring that academic, scientific and technological development is accessible to a broader range of users, enabling the development of new materials, processes, products and services through efficient use of mathematical sciences in real problems of the most diverse areas of knowledge.

In this context, we created a quality CeMEAI Corporate Education structure through which we can proceed with our technology transfer process in a structured and systemic manner, guaranteeing a vigorous learning process.

It is important to note that this technology transfer activity is integrated with the education and knowledge diffusion activities as described in Section 5, offering students a unique and significant opportunity to bring a real problem of their companies to be solved with the support of the CEPID-CeMEAI supervisors throughout the course.

Thus, in addition to training and developing theoretical and practical skills in data science, the student can also offer a solution to an industrial problem from his company.

Our courses are offered in different modalities, aligned with the practices and values of our partner companies' vision and mission, reflecting the compelling attendance of their needs.

We have the following training possibilities:

- Professional Master Program in Mathematics, Statistics and Computing Applied to Industry(MEAI);
- MBA on Data Science (online), 1st, 2nd, 3rd, 4th and 5th Editions;
- MBA on Data Security (online), 1st Edition;
- *In loco* and online Corporate Training Program;

- Specific short training.

We have trained staff from more than 400 companies and institutions, corresponding the following amount of staff from industries:

- 142 staff from the 1st Edition of the MBA in Data Science;
- 55 staff from the 1st Edition of the MBA in Data Security;
- 196 staff from the 2nd Edition of the MBA in Data Science;
- 165 staff from the 3rd Edition of the MBA in Data Science;
- 270 staff from the 4th Edition of the MBA in Data Science;
- 218 staff from the 5th Edition of the MBA in Data Science;
- 180 staff from the Statistics for Data Science;
- 19 staff from the Corporate Training Program in Data Science for the Sul America Insurance Company;

More information can be found at <http://cemeai.icmc.usp.br/acoest/educacao-corporativa>.

#### **4.2.4 HYBRID PBL AS AN TECHNOLOGY TRANSFER ACTIVITY**

The Problem-Based Learning (PBL) methodology aims to increase knowledge's practicality, retention and applicability. PBL has proved to be an excellent alternative to the traditional teaching methodology, with high levels of student satisfaction. Researchers at CEPID-CeMEAI have obtained favourable results regarding implementing this methodology, adapted to statistical disciplines, both at undergraduate and graduate levels. In particular, we proceed with an adapted hybrid structure in which students concomitantly receive training on the course topics but focus on solving real industrial problems on a vertical learning structure, which we named hybrid Problem-Based Learning (hiPBL).

More information can be found at <http://cemeai.icmc.usp.br/acoest/educacao-e-difusao/item/941-aprendizado-baseado-em-problema-industrial-hibrido-hipbl>.

### **4.3 NEW INITIATIVES**

---

As future initiatives, the strategy for innovation and technology transfer of the CEPID-CeMEAI should follow some basic lines of action to approximate the academy and industry. Particularly following the three initiatives below:

- Continue to encourage the Knowledge Transfer Workshops (KTW) and Study Groups with Industry (SGI);
- Continue to establish formal cooperation agreements and encourage applications for funding;
- Continue to incentivise the nucleation of start-ups/spin-off companies and the development of new products.

## **5. Education and Knowledge Diffusion Report**

### **5.1 INTRODUCTION**

---

The activities of Education and Knowledge Diffusion of CeMEAI focuses on the presentation of mathematical contents to students with different levels of knowledge, by organizing lectures and workshops for students visiting the university and visits to public schools. We believe that these activities contribute to a better dissemination of Mathematics both in itself but also in its interactions with the different areas of knowledge. In addition, the center's publications on the web, make it more visible to society the research activities carried out in universities. More information about the center and its projects can be found at [www.cemeai.icmc.usp.br](http://www.cemeai.icmc.usp.br).

### **5.2 ONGOING PROJECTS**

---

#### **5.2.1 MECAI**

The Professional Master Program in Mathematics, Statistics and Computing Applied to Industry (MECAI) is a two-years-of-study course started in August 2014. It represents one of the main initiatives of the RIDC-CeMEAI for improving the mathematical sciences background of employees of high-tech selected industries. MECAI is a modular M. Sc. course that can be tailored to meet a given demand. The first module in Finances was targeted at the banking industry and started with 20 students, all employees of banks or brokers. In 2024 the 10th module on Data Science started with new 215 students.

The professional master's degree is the first professional master's degree in Brazil that covers, in a comprehensive way, specific areas of mathematics, statistics and computing applied to industry. The goal is to improve the training of professionals and meet the demand of industry for personnel with a better background in the mathematical sciences. It is a very successfully program, with students of different backgrounds from companies like: Bank of America, Itaú, Morgan Stanley, Bradesco, Siemens, SAP, Nielsen, Cielo, Monsanto, TAM, Embrapa, HP, Serasa Experian, Embraer and others. More information about the Professional Master Program is available at <https://www.icmc.usp.br/pos-graduacao/mecai>.

#### **5.2.2 MBA IN DATA SCIENCE**

The 440-hour online graduate course, the MBA in Data Science is on its fifth edition with less than 10% of dropouts and maintaining a high Net Promoter Score of 40 (ranking Great). The 6th edition is planned to 2025.

More information can be found at [www.cemeai.icmc.usp.br/MBA](http://www.cemeai.icmc.usp.br/MBA).

### 5.2.3 MBA IN DATA SECURITY

Following the success of the MBA in Data Science, CeMEAI created another 400-hour online graduate course, the MBA in Data Security that started in June 2021. It has 55 students. More information can be found at [www.cemeai.icmc.usp.br/MBASD](http://www.cemeai.icmc.usp.br/MBASD).

### 5.2.4 EDUSCAR

By the end of 2018 the five RIDCs based in São Carlos together with the Engineering Research Center met at UFSCar, with the objective of improving education in São Carlos, using some schools as a test bed. The São Carlos' Education secretary and State Education Director were invited to this work-group, and we are working together since then. Several existing and new initiatives were proposed and are being carried out for the benefit of local public education. EduSCar activities are described on a separated report. Some of the results of the initiatives can be found in the Eduscar website <http://www.cemeai.icmc.usp.br/EduSCar/>

## 5.3 DISSEMINATION

---

During the period of this report 72 videos were produced and published with more than 26847 views. Our YouTube Channel grew from 1500 to 1610 subscriptions with more than 207,000 views (14,000 new views last 12 months). The website had more than 2,000 users per month in last months. There were 48 press releases in the period with a total of more than 30,000 hits on the website.

The Instagram page was created on august 2022 and there were more than 616 followers and 280 posts.

CeMEAI clipping includes more than 372 appearances in media in this report period including:

- TV Channels: CNN Brasil and Record News.
- Newspapers: Correio Popular, O Estado de São Paulo, Valor Econômico, O Globo and Folha de Pernambuco.
- Magazines and sites: Agência FAPESP, G1, UOL, Terra, Istoé, Veja, Jovem Pan, R7, BBC Brasil, Isto é Dinheiro, Reuters and Revista Pesquisa Fapesp.

### 5.3.1 WEBSITE AND SOCIAL MEDIA

- **Website:** <http://www.cemeai.icmc.usp.br>
- **Facebook:** <https://www.facebook.com/cepid.cemeai>
- **YouTube:** <https://www.youtube.com/cepidcemeai>
- **Twitter:** <https://twitter.com/cepidcemeai>
- **Instagram:** <https://www.instagram.com/cepidcemeai/>

## **6. Institutional Support to the Project**

The University of São Paulo through the Institute of Mathematical and Computer Sciences (ICMC) as the project host Institution has provided adequate support for the smooth running of it. The main support provided by ICMC is:

1. Two full-time staff working as industry liaison, knowledge and dissemination, and full support for visitors, meetings, industry contacts, and contracts
2. Office space for meetings and for the two staff. Computer infrastructure for the installation of the cluster Euler.
3. Vehicles and drivers for all the travel involved in the industrial contacts, workshops, and visitors transfers
4. Full support for accounting and keeping track of expenses and the necessary documentation. Full support for purchasing goods, booking hotels, and arranging and booking travel for all participants of Cepid-CeMEAI, including those from the associate institutions.
5. Full support for the organization of the Study Groups with Industry and Modeling Schools.
6. Full support for industry liaison and contracts conclusion.
7. Establishment of CEPIx-CeMEAI as part of the University structure

## **7. Activities plan for the next period**

As usual, for the next year, we intend to continue to organize the Study Groups with Industry (SGI), now in collaboration with SENAI, and with much hope that this will make it easier to reach more industries. As of last year the SGI was organized in full collaboration with SENAI and the workshop was a great success as can be viewed on the CeMEAI website. Another possible plan is that we might opt to run several short versions of the workshop each one dedicated to a different market niche. With eleven years of the project gone by, it became more realistic the idea of having research projects genuinely sponsored by the Center. CeMEAI sponsored the application of two new projects to Fapesp. One center for AI, was granted to Prof. André Carvalho, another CPA CDII was approved by Fapesp in addition to also being part of the IBM center C4AI, which was granted to Prof. Fabio Gagliardi Cozman from Poli-USP and has the participation of Alexandre Delbem from CeMEAI. We have also applied to the last round of the new EMBRAPPII call from MCTI and have been accepted as a full Embrapii Unit from December 2022. In an attempt to become more interdisciplinary, we are contacting other RIDCs aiming to encourage the possibility of having more mathematics in their activities. RIDCs that collaborate intensely with CeMEAI, at present, are CERTEV and NEV. We are also making arrangements for the Euler cluster upgrade in 2024, which is underway. There is also an initiative from the University administration to institutionalize CeMEAI as part of the University corporation that is now at completion.

# **Appendices**

## A. M.Sc. and PhD Students

### A.1 ONGOING PHDS

---

1. Adriane Caroline Teixeira Portela. Study of the virtual age of repairable systems in degradation models. Start: 2021. UFSCar. Supervisor: Vera Lucia Damasceno Tomazella
2. Aldimir José Bruzadin. Segmentação Semântica de Imagens via Aprendizado por Reforço Profundo e Minimização de Funcionais de Energia em Grafos. Start: 2022. UNESP. Funding: CAPES. Supervisor: Wallace Correa de Oliveira Casaca
3. Alex Leal Mota. Não Definido. Start: 2019. ICMC-USP. Co supervisor: Francisco Louzada Neto
4. Alfredo Guilherme da Silva Souza. Proteonica aplicada a detecção de Cancer. Start: 2019. ICMC-USP. Funding: CAPES. Supervisor: Adenilso da Silva Simão
5. Aline Roberta Santos Righi. Effects of Empirical Correlations for Crossflow Instabilities Applied to Laminar-Turbulent Transition. Start: 2019. ITA. Funding: FAPESP. Supervisor: João Luiz Azevedo

## A.2 COMPLETED Ph.D's

---

1. . Alan Reis. Uma contribuição ao estudo da interação rio-aquífero em áreas tropicais, utilizando a temperatura como traçador. 2023. EESC-USP. Funding: CAPES. Supervisor: Edson Cezar Wendland
2. . Alessandra Campos dos Santos. Estimativa da evapotranspiração em uma área remanescente de Cerrado sensu stricto utilizando metodologias de Sensoriamento Remoto e Eddy Covariance. 2023. EESC-USP. Funding: CAPES. Supervisor: Edson Cezar Wendland
3. . Alex de la Cruz Huayanay. Modelos alternativos para classificação em dados desbalanceados. 2023. ICMC-USP. Funding: CAPES. Supervisor: Jorge Luis Bazán Guzmán
4. . Anderson Paulo Avila Santos. HostAssociatedMetagenomeDB: a public repository of curated and standardized metadata of non-human host-associated metagenomes. 2024. ICMC-USP. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho

5. . André Simões Ballarin. Future perspectives of extreme events and water availability in Brazilian catchments. 2024. EESC-USP. Funding: FAPESP. Supervisor: Edson Cesar Wendland
6. . Angelo Garangau Menezes. Continual Object Detection with Deep Neural Networks. 2023. ICMC-USP. Funding: CAPES. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
7. . Arianne Alves da Silva. Roteamento de Estoque e Transporte de Carga Multimodal: Otimização Bi-objetivo com Considerações Ambientais e Econômicas. 2024. ICMC-USP. Supervisor: Maristela Oliveira dos Santos
8. . Caio Flávio Martinez Fontoura Junior. Avaliação de Métricas de Inpainting Digital para Aferição da Qualidade na Extração de Feições em Imagens de Sensoriamento Remoto. 2024. UNESP. Funding: CAPES. Supervisor: Wallace Correa de Oliveira Casaca
9. . Caio Lopes Borges Andrade. Uso de Aprendizado de Máquina na identificação de plasmócitos em lâminas de aspirado de medula óssea de casos de Mieloma Múltiplo. 2023. UFBA. Funding: CAPES. Co-supervisor: Ricardo Araújo Rios
10. . Caio Paziani Tomazella. Modelos e Métodos de Solução para o problema de Dimensionamento de Lotes e Compra de Matéria Prima . 2024. ICMC-USP. Supervisor: Maristela Oliveira dos Santos
11. . Carlos Alberto Valentim Junior. Fractional Mathematical Oncology: cancer dynamics from an interdisciplinary viewpoint. 2023. FZEA - USP. Funding: CAPES. Supervisor: José Antonio Rabi
12. . Claudia Evelyn Escobar Montecino. Using VAE for Incomplete Educational Data. 2023. ICMC-USP. Funding: CAPES. Supervisor: Mariana Cúri
13. . Daniel Felipe da Silva Santos. Rastreamento de Pessoas em Vídeo Utilizando Aprendizado em Profundidade. 2024. UNESP. Funding: Petrobras. Supervisor: João Paulo Papa
14. . Dimaghi Schwamback. Hydrological and erosional dynamics: Responses to changes in land uses and climate in the Cerrado biome. 2024. EESC-USP. Funding: FAPESP. Supervisor: Edson Cesar Wendland
15. . Éder Silva de Brito. Reliability analysis of repairable systems considering unobserved heterogeneity and competing risks. 2023. USP. Co-supervisor: Paulo Henrique Ferreira da Silva
16. . Elidiane Pereira dos Santos. FRB-BlinGui: Um Modelo Baseado em Regras Fuzzy para Previsão de Riscos de Colisão com Obstáculos em Apoio a Pessoas com Deficiência Visual. 2024. UFBA. Funding: CAPES. Supervisor: Tatiane Nogueira Rios
17. . Evandro Ortigossa. T-Explainer: uma abordagem para a explicabilidade em aprendizado de máquina baseada em gradientes. 2024. ICMC-USP. Funding: CAPES. Supervisor: Luis Gustavo Nonato
18. . Fabiano Rodrigues Coelho. Diagnóstico e seleção de modelos com resposta binária e função de ligação assimétrica. 2023. ICMC-USP. Funding: CAPES. Supervisor: Cibele Maria Russo Novelli
19. . Francis Lorena Larreal Herrera. Restauração Inexata com avaliação imprecisa da função objetivo e das restrições. 2023. UNICAMP. Co-supervisor: Luís Felipe Cesar da Rocha Bueno
20. . Gabriel Capiteli Bertocco. Self-supervised learning for fully unannotated person re-identification in real-world applications. 2024. UNICAMP. Funding: FAPESP. Supervisor: Anderson de Rezende Rocha

21. . Gean Trindade Pereira. Meta-Learning applied to Neural Architecture Search. Towards new interactive learning approaches for indexing and analyzing images from expert domains. 2024. ICMC-USP. Funding: FAPESP. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
22. . Guilherme Brandão Martins. Floresta de Caminhos Ótimos no Auxílio a Filtragem Colaborativa. 2023. UFSCar. Funding: CAPES. Supervisor: João Paulo Papa
23. . Hugo Felippe da Silva Lui. Investigation of shock-boundary layer interactions in a supersonic axial turbine. 2024. UNICAMP. Funding: FAPESP. Supervisor: William Roberto Wolf
24. . Josimar Edinson Chire Saire. Classificação de Alto Nível Baseada em Redes Complexas. 2023. FFCLRP-USP. Funding: CAPES. Supervisor: Zhao Liang
25. . Jullian Souza Sone. A tale of two cities: public preferences for nature-based solutions and the effect of drought-related experiences on willingness to improve water security. 2023. EESC-USP. Funding: CAPES. Supervisor: Edson Cezar Wendland
26. . Kennedy Anderson Guimarães de Araujo. O problema de sequenciamento job shop flexível com flexibilidade de sequência e efeito de aprendizagem baseado em posição. 2024. IME-USP. Funding: CAPES. Supervisor: Ernesto Julián Goldberg Birgin
27. . Leo Sampaio Ferraz Ribeiro. Cross Domain Visual Search with Feature Learning using Multi-stream Transformer-based Architectures. 2023. ICMC-USP. Funding: FAPESP. Supervisor: Moacir Antonelli Ponti
28. . Maria Gabriela Valeriano. Machine Learning Models for healthcare: a data-centric approach. 2024. Unifesp. Funding: CAPES. Supervisor: Ana Carolina Lorena
29. . Pedro Arbs Paiva. An instance space analysis of classification datasets. 2023. ITA. Supervisor: Ana Carolina Lorena
30. . Pedro Henrique Toledo de Oliveira Sousa. Uma abordagem Bayesiana para representação de dados funcionais e seleção de variáveis em regressão funcional. 2023. UNICAMP. Funding: CAPES. Supervisor: Ronaldo Dias
31. . Pedro Paulo de Carvalho Brito. Control of surface imperfections on the transition of boundary layers. 2023. ITA. Funding: CNPq. Supervisor: André Valdetaro Gomes Cavalieri
32. . Robson Parmezan Bonidia. BioAutoML: Democratizing Machine Learning in Life Sciences. 2024. ICMC-USP. Funding: CAPES. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
33. . Rodrigo Barbosa Moreira. Um Princípio do Máximo Assintótico e uma Condição de Qualificação Associada para Controle Ótimo com Restrições Mistas. 2024. UNESP. Funding: CAPES. Supervisor: Valeriano Antunes de Oliveira
34. . Rodrigo Franciquini da Silva. Spectral Analysis for Anomaly Detection in Dynamic Networks with Attributes. 2023. Unifesp. Funding: FAPESP. Supervisor: Mariá Cristina Vasconcelos Nascimento Rosset
35. . Tarcísio Costa Déda Oliveira. Closed-loop control of unsteady flows: nonlinear control techniques via extremum seeking and neural networks. 2023. UNICAMP. Funding: FAPESP. Supervisor: William Roberto Wolf

36. . Thales de Oliveira Gonçalves. Graph Neural Networks: contributions and advancements. 2024. ICMC-USP. Funding: CAPES. Supervisor: Luis Gustavo Nonato
37. . Thiago José dos Santos Vieira. Optimization of aircraft routing with crew pairing for nonscheduled air transportation. 2024. UFSCar. Funding: FAPESP. Supervisor: Pedro Augusto Munari Junior
38. . Tito Livio. Modelagem de sistemas complexo reparáveis para determinação de um política de manutenção ótima. 2023. UFSCar. Funding: . Supervisor: Vera Lucia Damasceno Tomazella
39. . Verônica Vannini. Harpia: A Hybrid System for UAV Missions. 2023. ICMC-USP. Funding: CAPES. Supervisor: Claudio Fabiano Motta Toledo
40. . Victor Hugo Andrade Soares. Techniques for cattle detection, duplicate removal and counting in large pasture areas using multiple aerial images. 2023. ICMC-USP. Co-supervisor: Moacir Antonelli Ponti
41. . Yangyang Chen. Modelos espaciais temporais via ondaletas. 2023. USP. Funding: FAPESP. Co-supervisor: Ronaldo Dias

### A.3 ONGOING M.Sc.

---

1. Abraão da Silva Guimarães. Estudo sobre um problema de planejamento de produção agrícola familiar orgânica usando técnicas de Otimização. Start: 2024. ICMC-USP. Funding: CAPES. Supervisor: Marina Andretta
2. Alex Augusto Nunes Machado. Heurísticas de Decomposição para um Problema Integrado de Dimensionamento de lotes e roteamento. Start: 2023. ICMC-USP. Supervisor: Maristela Oliveira dos Santos
3. Alex Fidalgo Zamikhowsky Lopes. Avaliação da Técnica Stacking no Contexto de Ciências Atmosféricas. Start: 2023. EACH-USP. Supervisor: Marcelo de Souza Lauretto
4. Alex Paranahyba de Abreu. Problemas de roteamento de veículos com coletas e entregas sob incertezas nos tempos de viagem e demandas. Start: 2022. UFSCar. Supervisor: Pedro Augusto Munari Junior
5. Aline Martins Nascimento Belchior. Identificação de Vieses em Bases de Dados Criminais. Start: 2024. ICMC-USP. Supervisor: Luis Gustavo Nonato
6. Amanda Vitória Alves De Paula. The Defective Gompertz and Inverse-Gaussian regression models in the presence of competing and complementary risks for modeling long-term survivors. Start: 2023. UNESP. Supervisor: Pedro Luiz Ramos
7. Amanda Zanluca. TBA. Start: 2024. UFPR. Supervisor: Anderson de Rezende Rocha
8. Ana Catarina Pais Pereira. Deep Learning Techniques Applied to The Diagnostic of Focal Cortical Dysplasia MRI. Start: 2024. Universidade de Coimbra. Co supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
9. Ana Letícia Garcez Vicente. Redes Neurais para Grafos aplicadas a classificação de sintomas de autismo em dados de fMRI. Start: 2023. ICMC-USP. Funding: FAPESP. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho

10. Andrés Mauricio Ibarra Rodríguez. TBA. Start: 2024. IME-USP. Funding: CAPES. Supervisor: Ernesto Julián Goldberg Birgin
11. Andrês Rodrigues Oliveira. Geometria de Distâncias e o Alpha Fold. Start: 2023. UNICAMP. Funding: CAPES. Supervisor: Carlile Campos Lavor
12. Angelo Victor Kraemer Foletto. Combinando as camadas IoT de sensores e do portal para detectar enchentes. Start: 2021. ICMC-USP. Funding: CAPES. Supervisor: Jó Ueyama
13. Anton Bulle Labate. Infusão de Análise Sintática e Semântica em Transformers. Start: 2024. EP-USP. Funding: FUSP. Supervisor: Fabio Gagliardi Cozman
14. Arthur Dantas Mangussi. An unified approach for dealing with missing and noise data. Start: 2022. Unifesp. Funding: FAPESP. Supervisor: Ana Carolina Lorena
15. Arthur Dorigueto Delevedove. Crime Analysis. Start: 2022. ICMC-USP. Funding: CAPES. Supervisor: Afonso Paiva Neto
16. Artur Souza Freitas. Avaliação do desempenho de características sociais do nó como medida de seleção de veículos em redes veiculares de aprendizado federado. Start: 2020. ICMC-USP. Supervisor: Júlio Cézar Estrella
17. Atila Ferreira Pessoa. Técnicas de Machine Learning aplicadas ao estudo de intrusão de vapores. Start: 2021. ICMC-USP. Supervisor: Fabrício Simeoni de Sousa
18. Beatriz Ribeiro Bello. Heurísticas para otimização energética em sistemas de distribuição de água. Start: 2022. UNESP. Funding: CAPES. Supervisor: Edilaine Martins Soler
19. Benedito Faustinoni. Modelos de volatilidade estocástica e metaheuristicas: um ensaio do portfólio ótimo. Start: 2021. ICMC-USP. Supervisor: Victor Claudio Bento de Camargo
20. Bernardo Mota Barbosa. Análise de risco de equipamentos da indústria do petróleo. Start: 2021. ICMC-USP. Supervisor: Antonio Castelo Filho
21. Brenda Lima Boaventura. Aprendizado de máquina no contexto do pareamento e ponderação pelo escore de propensão. Start: 2021. UFBA. Funding: FAPESB. Co supervisor: Paulo Henrique Ferreira da Silva
22. Breno Ceconello. Métodos de elementos finitos aplicados ao escamamento em redes complexas. Start: 2023. UNICAMP. Funding: CAPES. Supervisor: Maicon Ribeiro Correa
23. Breno Kenji Ogata. Control Strategies for Deformable Microswimmers. Start: 2023. ICMC-USP. Funding: CAPES. Supervisor: Roberto Federico Ausas
24. Bruno Aparecido Silvestre. Avaliação formativa adaptativa com base em modelos de variáveis latentes no Moodle. Start: 2023. ICMC-USP. Supervisor: Mariana Cúri
25. Bruno Edson dos Santos. Métodos de solução para o problema de empacotamento de peças irregulares em objetos irregulares. Start: 2024. UEL. Funding: CNPq. Supervisor: Aline Aparecida de Souza Leão
26. Bruno Miquéias de Melo. Utilização de algoritmo de inteligência artificial para otimização da manutenção preventiva em bombas submersas. Start: 2023. FFCLRP-USP. Supervisor: Renato Tinós

27. Callebe Rocha Reis. Métodos de decomposição de domínio multiescala para o modelo de Stokes-Brinkman. Start: 2023. ICMC-USP. Supervisor: Fabrício Simeoni de Sousa
28. Camila Braz Soares. TBA. Start: 2023. UFBA. Co supervisor: Paulo Henrique Silva
29. Camila Machado de Araújo. Automatic Analysis of X-Ray Diffraction Patterns with Deep Learning. Start: 2022. UNICAMP. Funding: Instituto Serrapilheira. Supervisor: Anderson de Rezende Rocha
30. Carlos Alonso Rodrigues. Análise de Estabilidade de Camadas Limite Compressíveis. Start: 2021. UNICAMP. Supervisor: William Roberto Wolf
31. Cayan Dantas. TBD. Start: 2023. UNICAMP. Funding: CAPES. Supervisor: William Roberto Wolf
32. César Ambrogi Ferreira do Lago. Otimizacao de Medidas Mitigadores da Drenagem Urbana usando Biorretencao. Start: 2016. EESC-USP. Funding: CAPES. Supervisor: Eduardo Mario Mendiondo
33. Chiara Cotta e Titton. Desenvolvimento de métodos semi-empíricos para avaliação do efeito instatativo da hélice na aeronave aplicáveis às fases iniciais de projeto de uma aeronave. Start: 2023. ITA. Supervisor: Roberto Gil Annes da Silva
34. Claudio Generoso. TBA. Start: 2023. Unifesp. Supervisor: Ana Carolina Lorena
35. Connor Davis Sterrett. Learning from COVID: A Credit-Risk Pandemic Playbook. Start: 2020. ICMC-USP. Supervisor: Gleici da Silva Castro Perdoná
36. Daniel Coutinho Ayub. Não Definido. Start: 2019. ICMC-USP. Supervisor: Francisco Louzada Neto
37. Daniel Martins de Souza. Uso de Algoritmos Genéticos para Investigar a Interação de Neurônios de uma Rede Neural Recorrente em Ratos Virtuais. Start: 2024. FFCLRP-USP. Funding: CNPq. Supervisor: Renato Tinós
38. Daniel Ricardo Dallos Sanabria. Estudo experimental e análise de dados de escoamento bifásico a baixas e altas pressões em inclinações ascendentes e descendentes. Start: 2024. USP . Funding: FUSP. Supervisor: Oscar Mauricio Hernandez Rodriguez
39. Daniel Shinoda Pascoal. Marketing Mix Modeling for Online Retailers - Optimizing advertising budget allocation in a multi-geography and multi-product scenario with limited past data. Start: 2020. ICMC-USP. Supervisor: Victor Claudio Bento de Camargo
40. Débora Fonseca de Abreu Rangel. Abordando Fundamentos de Matemática no Ensino Médio,. Start: 2018. UNICAMP. Funding: CAPES. Supervisor: Lucio Tunes dos Santos
41. Débora Leandro de Andrade. Estudo do comportamento da dinâmica de voo de veículos com propulsão distribuída. Start: 2023. ITA. Supervisor: Roberto Gil Annes da Silva
42. Dérick Welman. TBA. Start: 2022. ITA. Supervisor: Ana Carolina Lorena
43. Eduardo da Silva Afonso. Explainable AI. Start: 2021. FFCLRP-USP. Supervisor: Zhao Liang
44. Eduardo de Andrade Montez. Modelos Geoespaciais Aplicados à previsão e planejamento de demanda por produto e região geográfica no e-commerce. Start: 2022. ICMC-USP. Supervisor: Cibele Maria Russo Novelli

45. Eduardo Santos Carlos de Souza. Segmentação e Classificação de Terreno a Partir de Imagens Aéreas em Cenários com Poucos Recursos. Start: 2020. ICMC-USP. Funding: CNPq. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
46. Eduardo Soares Zanutti. A otimização de sortimento e de preços na indústria de moda rápida: uma abordagem de modelos lineares generalizados hierárquicos. Start: 2023. ICMC-USP. Supervisor: Victor Claudio Bento de Camargo
47. Eleandro Santana Bernachi. Aproximação Numérica de Funções Transcendentais. Start: 2018. UNICAMP. Supervisor: Lucio Tunes dos Santos
48. Fausto Marques Pinheiro Junior. Métodos Estatísticos em Geometria de Distâncias. Start: 2023. UNICAMP. Funding: CAPES. Supervisor: Carlile Campos Lavor
49. Felipe Alves Siqueira. Deep Learning applied to Portuguese text data. Start: 2022. ICMC-USP. Funding: CAPES. Supervisor: André Carlos Ponce de Leon Ferreira de Carvalho
50. Felipe Augusto Arguello de Souza. Observatório Cidadão para a Segurança Hídrica. Start: 2017. EESC-USP. Funding: CNPq. Supervisor: Eduardo Mario Mendiondo
51. Felipe Dutra Lisboa. Uma Abordagem para Detecção de Novas Classes para Aprendizado Contínuo. Start: 2023. UNESP. Supervisor: André Luis Debiased Rossi
52. Felipe Guilermmo Santuche Moleiro. Animação de fluidos usando técnicas de machine learning. Start: 2024. ICMC-USP. Funding: CAPES. Supervisor: Fabrício Simeoni de Sousa
53. Felipe Marins Beloso. Tópicos Interdisciplinares de Matemática Geografia. Start: 2018. UNICAMP. Funding: CAPES. Supervisor: Lucio Tunes dos Santos
54. Fernanda Bartolo dos Santos Saran. Modelagem estatística da impunidade: métodos inferenciais e preditivos para dados de crimes no estado de São Paulo. Start: 2024. ICMC-USP. Supervisor: Cibele Maria Russo Novelli
